Webinar Controls Review  
Virtual Neighborhood Meeting

Webinar Window

Tip: If you accidentally close the webinar, just click the link in your email that you used to launch the webinar.

Webinar Control Panel

Find and click the "Goto" logo if you accidentally minimize the webinar window

# Copper Ave Trail Improvements

## Webinar Controls Review

### Virtual Neighborhood Meeting

#### Open and Close Control Panel

Icon may be small and at the edge of the screen. It may minimize on its own after a few seconds. Click arrow to bring it back.

#### Mute/Unmute Button

Used to mute and unmute your microphone.  
Will be automatically muted when you first join.

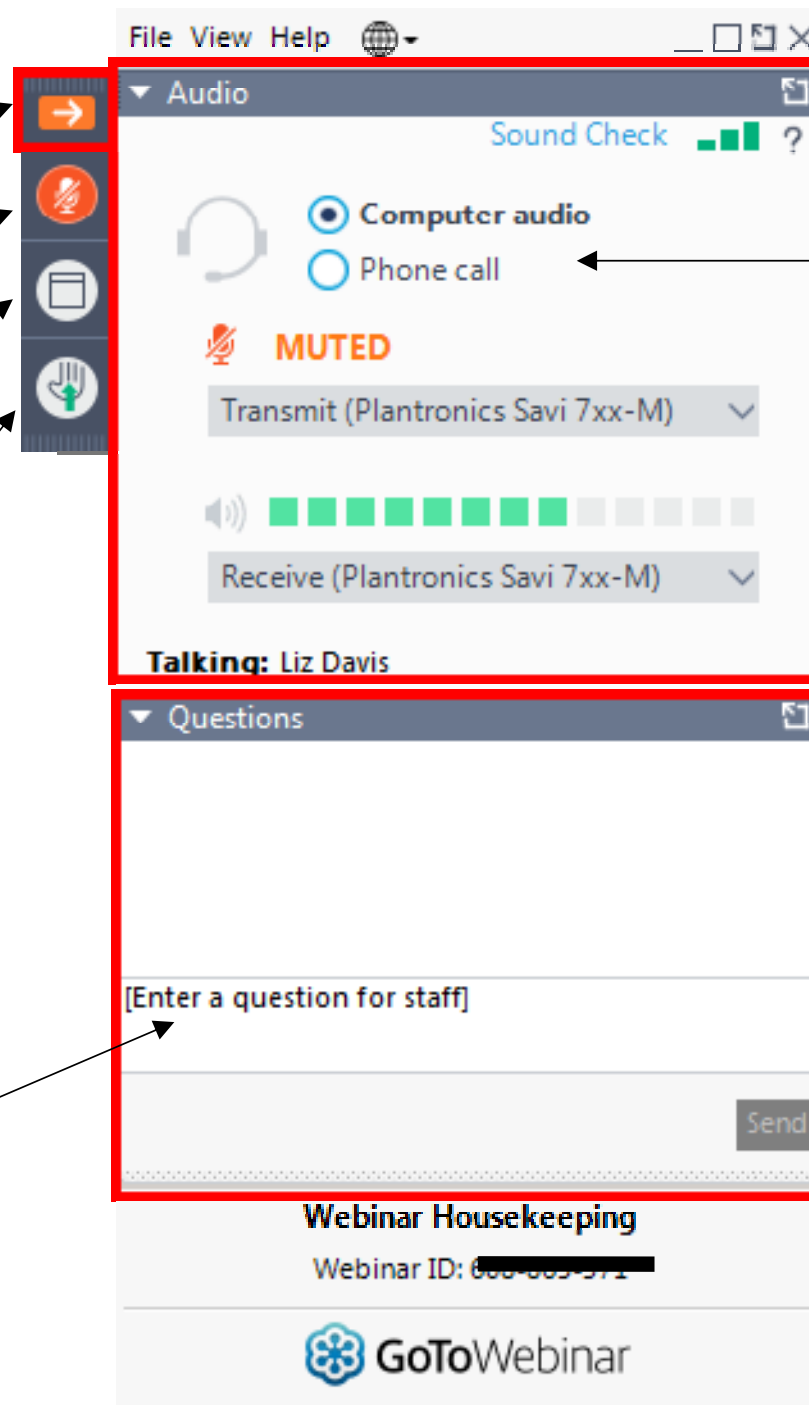

#### Full Screen Mode Toggle

#### Raise Your Hand Button

Click to notify Organizer that you would like to say your question/comment out loud. Wait for Organizer to unmute you.

#### Questions/Comments Box

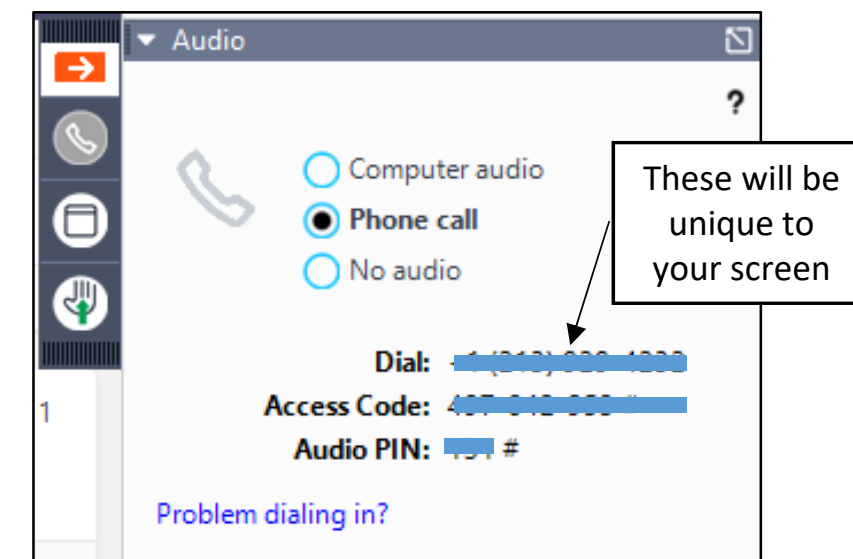

They will be read out loud and addressed/noted throughout the meeting or during the Q&A period.

#### Audio Controls:

If your computer does not have a microphone, or if the sound is choppy, select 'Phone Call' and follow the instructions on the call. This option allows you to SEE the presentation on your computer screen, but HEAR and SPEAK through the phone call. Clicking Phone call will cut off the computer's sound (that's normal).

If you call in *without* clicking 'Phone Call', the computer and phone will produce an echo.

Note that if you don't enter your audio pin, the Organizer cannot unmute you, and you are in listen-only mode.

You can also text a question or comment to **505-366-4743**
